**Art.-Nr.: 92360260**

**INSTRUCTION**

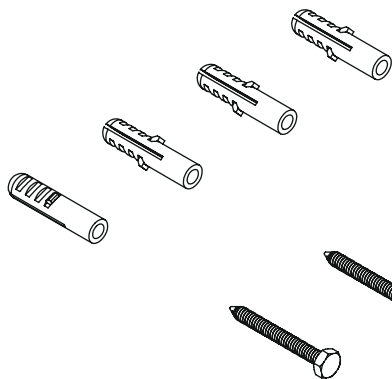

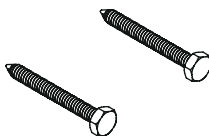

## Installation Illustration

| Accessory List |                |               |          |
|----------------|----------------|---------------|----------|
| No.            | Description    | Specification | Quantity |
| 1              | Expansion Bolt | M5*50         | 4pcs     |
| 2              | Hex Key        | M4*120        | 1pc      |

Plastic Expansion Sleeve x 4 pcs

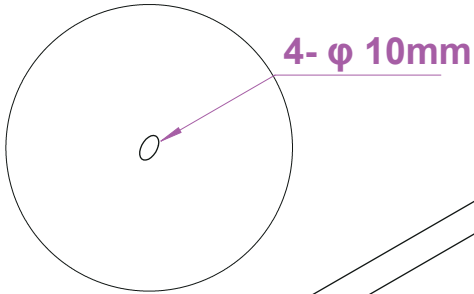

Hex Key x 1 pc

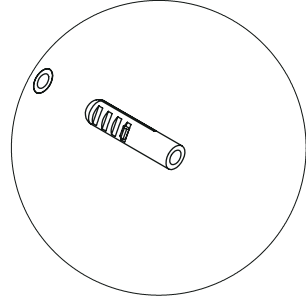

Mounting Screws x 4 pcs

## Installation Illustration

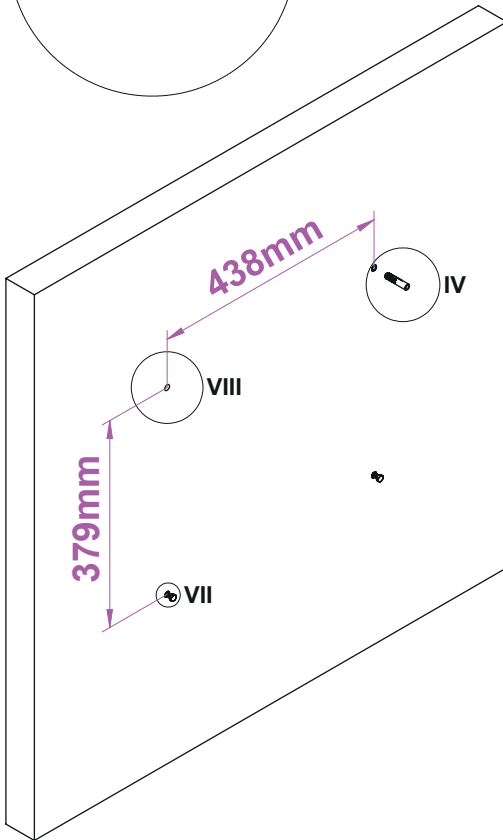

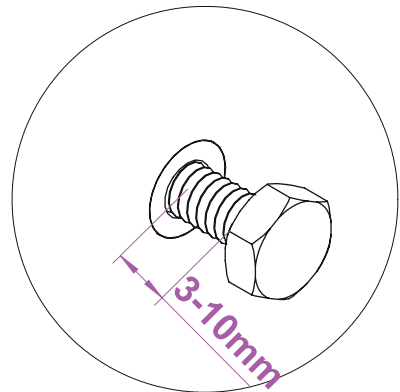

1. Drill 4pcs holes on the wall with diameter 10mm and depth 50-60mm

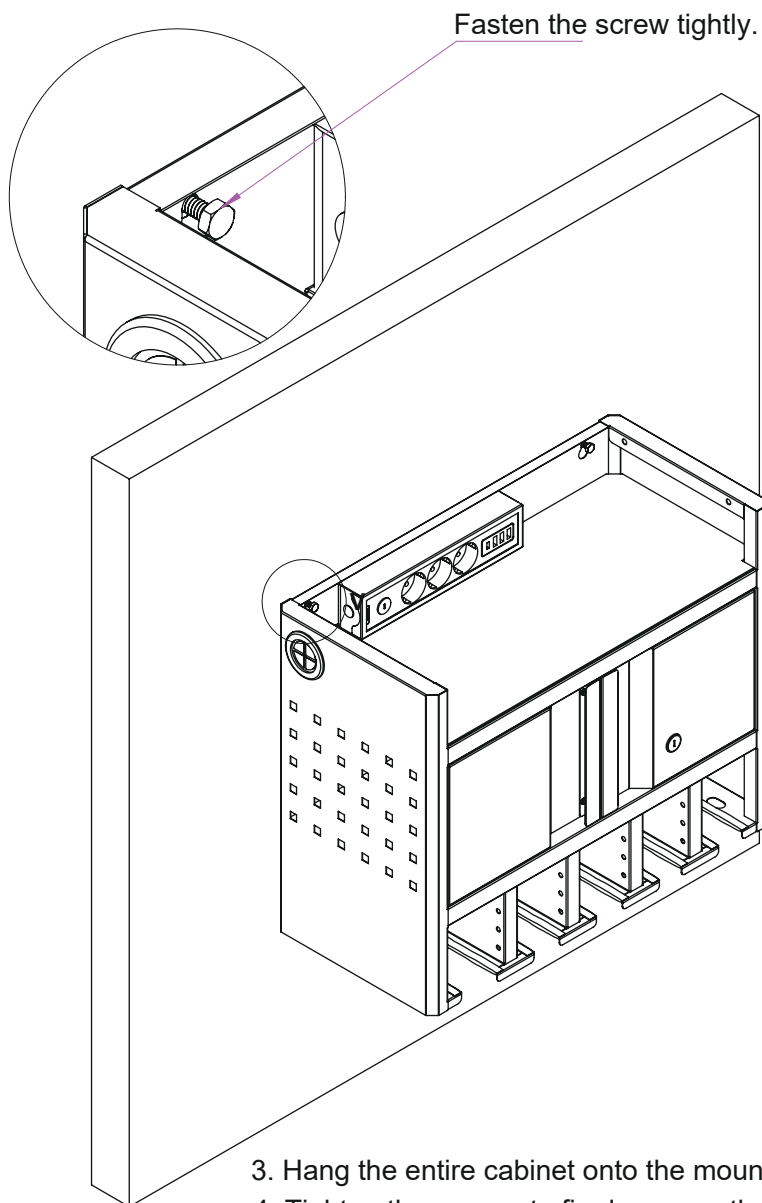

2. Insert the expanded plastic sleeve into the hole, with the outer side flush with the wall surface

3. Put screw into the wall, leaving a margin of 3-10mm

## Installation Illustration

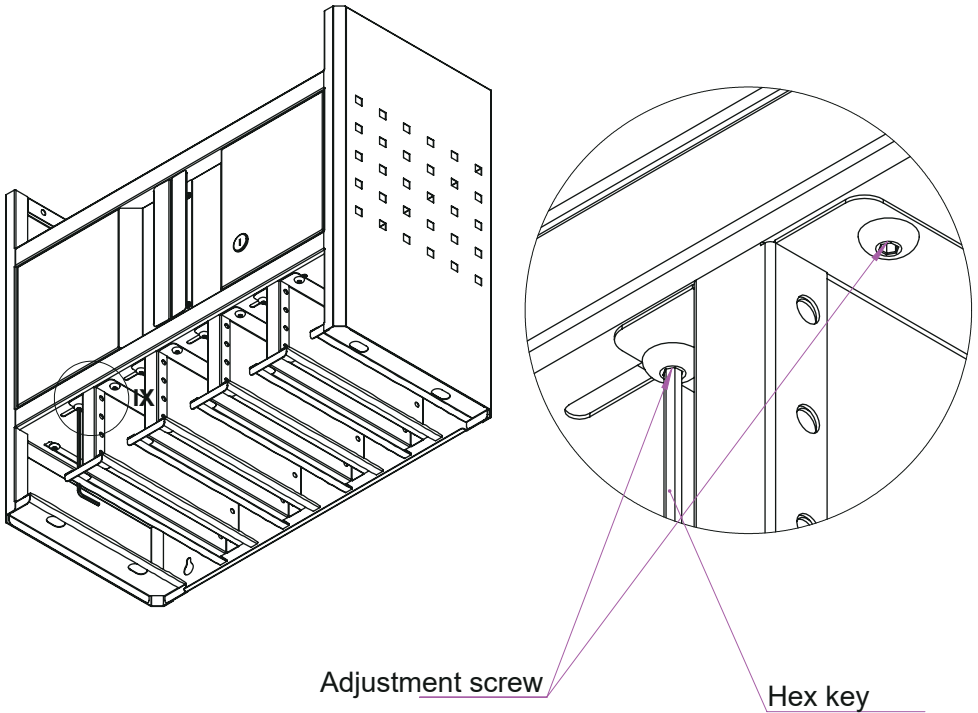

3. Hang the entire cabinet onto the mounting points.
4. Tighten the screws to firmly secure the cabinet.

# Adjustment Diagram

## Method 1: Overall Adjustment

1. Loosen the 4 screws distributed in front and behind the hanger.
2. Adjust the hanger to desired position.
3. Fasten the 4 screws back.

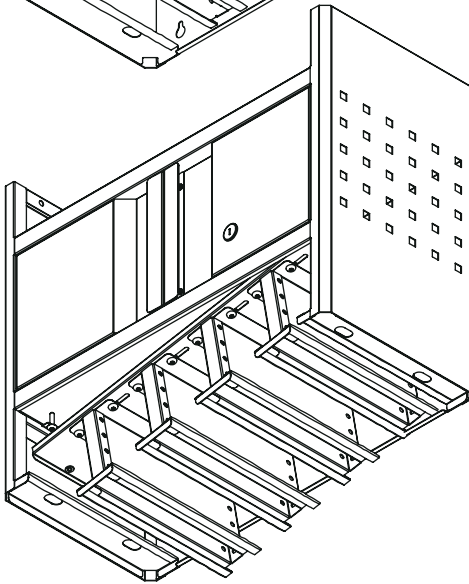

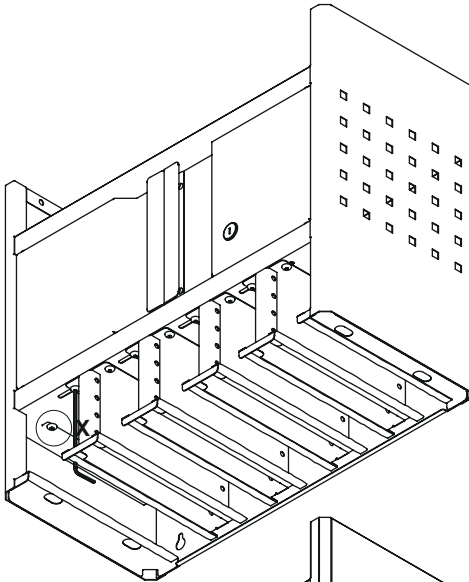

## **WARNING:**

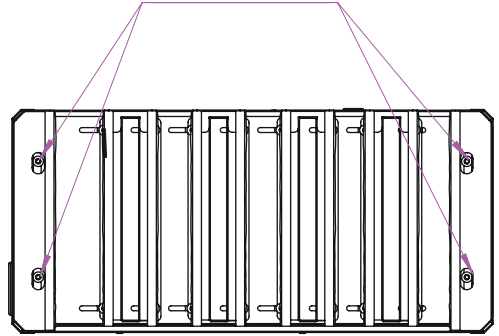

*For your safety, when adjusting the spacing between the hangers, simply loosen the screws until the hangers can be moved, and do not completely loosen out the screws.*

# Adjustment Diagram

## Method 2: Removable Adjustment

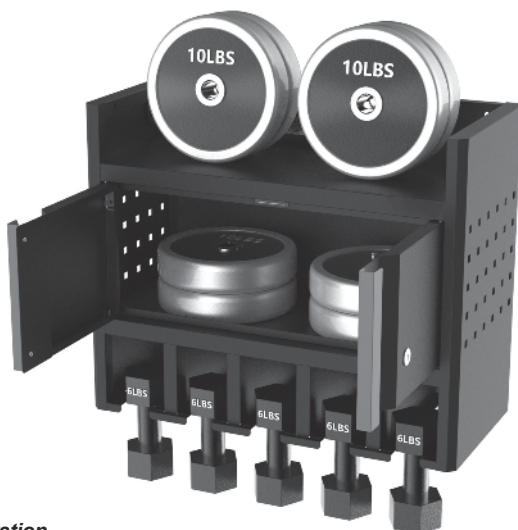

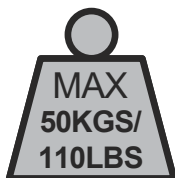

Adjust the 4 screws located on both sides with the Hex Key.

1. Loosen out the 4 screws.
2. Remove the hanger
3. Afterwards, adjust the hanger-distance as desired according to Method 1
4. Finally, install back the hanger.

## Weight-Bearing Warning

*For your safety consideration,  
please make sure the total loading weight  
should less than 50KGS/110LBS.*
