

MANUAL

UNIVERSAL BLOCK-OFF BLADDER „EASY INTAKE™“

90967055

With Easy INTAKE™ a quick leak test of the entire intake and exhaust system can be carried out in one simple process. Leaky hose connections and hairline cracks can be found quick and easy (e.g. of the turbocharger) and hairline racks in assemblies (e.g., to intercooler) etc.

Replacement equipment

- | | |
|---|---------------------------------|
| 1 | 9096016 Double Plug DN5 |
| 2 | 90967030 2 Replacement Bladders |

The inflatable bladder closes the system, which is subsequently put under pressure with a diagnostic leak detector to find the leak. The patent pending block off bladder adapts to any shape intake or exhaust: round, oval, square, rectangular or severely angled. Additionally does it make it possible to close hard to reach systems, while allowing smoke or compressed-air to pass through.

Diameter operating range	Ø 49 mm - Ø 140 mm
